PROFIL

B.Sc. graduate in Business Information Systems with practical experience in web application development and agile software projects. Proficient in JavaScript, TypeScript, Java, Python, HTML, CSS, and REST APIs, complemented by experience with Git, Jira, and Confluence. Through working student positions, university projects, and self-directed portfolio work, I have analyzed technical requirements and translated them into practical software solutions. I am a structured and fast learner who enjoys adapting to new technologies and is eager to contribute to the development of modern software solutions as part of a collaborative engineering team.

BERUFSERFAHRUNG

Working Student – Digital Products
Walhalla Mediengruppe

03/2025 – 04/2026
Remote

- Supported migration and rollout of a Shopware 6 e-commerce platform, including migration of product, content, and system data.
- Created and analyzed product usage reports and performance metrics to support data-driven quality improvements.
- Managed digital product content in XML, PDF, and EPUB formats, ensuring consistent publication across multiple distribution channels.
- Created and maintained digital publications and e-books to optimize content delivery for customers and business partners.
- Analyzed customer feedback and user behavior using SurveyMonkey and reporting tools to identify opportunities for product improvements.
- Maintained and enriched CRM and product databases to improve data quality and support marketing and customer retention initiatives.

Working Student – Content Management
Experience One AG | Projekt: Mercedes-Benz Vans VMK

05/2023 – 10/2024
Remote

- Maintained and updated product, vehicle equipment, and image content for the Mercedes-Benz Vans website.
- Tagged and quality-checked image assets to optimize content structure and searchability.
- Managed digital content in Confluence, SSP, PM ASL, and other Mercedes-Benz-specific systems.
- Supported content management in Sanity Studio (CMS) and coordinated content updates with project management and business teams.
- Implemented website updates based on requirements and documentation.

Working Student – Data Management
xeomed GmbH & Co. KG

03/2022 – 02/2023
Remote

- Performed quality checks and cleansing of CRM datasets (duplicates, inconsistencies, completeness) to ensure data-driven sales processes.
- Conducted market and company research to identify new business opportunities.
- Planned and conducted structured website testing (functional and content-related) prior to digital product and content launches, and documented test results and identified issues.
- Created process documentation and maintained digital content in CMS systems.

PERSONAL PROJECTS

QA Test Automation – SauceDemo
Playwright, JavaScript, GitHub Actions

github.com/festina-sallahi/qa-test-automation

- Built an end-to-end test suite for a live e-commerce demo site using Playwright, the Page Object Model, and custom fixtures — covering 11 scenarios across login, cart, and checkout flows.
- Configured cross-browser execution (Chromium, Firefox, WebKit) and wired the suite into GitHub Actions so every push runs headless and publishes an HTML report.

AI Code Reviewer
Node.js, TypeScript, Claude API

github.com/festina-sallahi/ai-code-reviewer

- Built a CLI tool that reviews a git diff using the Claude API and reports concrete findings — file, line, severity — validated against a demo branch with a planted bug.
- Used structured outputs (Zod-validated JSON schema) so responses parse reliably into typed results, behind a swappable provider interface for other models.

Review Dashboard

github.com/festina-sallahi/review-dashboard

Angular, TypeScript

- Designed and built a pull-request review dashboard in Angular — PR list, findings detail, activity feed, and integrations screens — with 28 unit tests and a layout responsive down to mobile.
- Built the app around a swappable data-provider interface so a real Bitbucket/Jira backend could be plugged in without changing any component.

SKILLS

JavaScript	Angular	Git/GitHub	HTML	Generative KI-Tools
TypeScript	Automated Testing	Jira	CSS	(ChatGPT, Claude)
Python	(Playwright)	Confluence	REST APIs	SurveyMonkey
Java	Manual Functional	Figma	XML	
SAP ABAP	Testing	Shopware 6		
	Website QA	Sanity Studio		
	Test Case	WordPress		
	Documentation			
	Bug Reporting			

EDUCATION

University of Passau	Passau, DE
<i>Bachelor of Science (B.Sc.) in Business Information Systems</i>	09/2020 – 04/2026
Overall Grade: 3.3 Software Engineering Project: 1.0	
Kuvendi i Arberit High School	Ferizaj, Kosovo
<i>University Entrance Qualification</i>	09/2015 – 07/2018
Final Grade: 1.7	

INTERNSHIPS & ACADEMIC PROJECTS

Team-Based Software Engineering Project	11/2023 – 02/2024
<i>Universität Passau</i>	Passau, DE
- Developed a full-stack web application in a four-member team using Flask, Python, JavaScript, and MySQL, contributing to the entire software development lifecycle from requirements analysis and implementation to deployment. - Designed and implemented the application's UI/UX using Figma and developed a responsive, user-friendly frontend. - Planned and executed unit tests and manual functional testing, identifying and documenting bugs through structured code reviews using Git/GitHub. - Completed the project with the highest grade (1.0).	
ERP Systems Internship	04/2023
<i>Universität Passau & msg systems ag</i>	Passau, DE
- Completed an intensive two-week SAP internship at msg systems AG with a focus on ERP systems and enterprise application development. - Gained hands-on experience with ABAP, ABAP Objects, SAP Fiori, and the RESTful ABAP Programming Model (RAP) through practical development exercises across the full-stack development process. - Analyzed business requirements, translated them into technical ERP solutions, and verified application functionality throughout the development process. - Collaborated in a professional project environment and gained insights into the consulting and software development processes of a leading IT consulting company.	

CERTIFICATIONS

Advanced Project Management — University of Passau, 06/2022
Learn Java Course — codecademy, 04/2022
The Complete Java Certification Course — Udemy, 11/2021
WordPress Fundamentals — University of Passau, 07/2021

VOLUNTEER

Volunteer Learning Mentor	2024 – 2026
Provided individualized language support to students with migrant backgrounds.	
Assisted students in German and Mathematics.	

LANGUAGES

Albanian: Native
German: Fluent (C1)
English: Fluent (C1)
